Information Technology student with knowledge of cybersecurity, technical troubleshooting, and web development. Experienced in customer support as a BPO representative, where I developed strong problem-solving, communication, and technical support skills while maintaining a low call transfer rate of approximately 5% by resolving customer concerns efficiently. Quick to learn new technologies, adaptable to fast-paced environments, and eager to apply my technical knowledge and customer service experience in an entry-level IT Support, Help Desk, Service Desk, or Technical Support role.

Work Experience

Customer Service Representative (CSR)

VXI Global Solutions-Quezon City

June 2025 to July 2026

Delivered customer support via phone by assisting customers with billing, account, and technical concerns while providing professional and empathetic service. Utilized strong troubleshooting and critical-thinking skills to achieve an approximate 95% issue resolution rate and maintain a low call transfer rate of around 5% by resolving concerns on the first interaction whenever possible. Built trust and rapport through clear, confident, and effective communication, resulting in approximately 40% of returning callers requesting to speak with me directly. Quickly adapted to company systems and procedures, worked efficiently in a fast-paced environment, and consistently focused on delivering accurate solutions and an excellent customer experience.
